

Traffic Improvement Projects

Traffic Signal Modification at Alton Parkway/Towne Centre Drive/Rancho Parkway

The project includes the design and construction of the fourth leg (Rancho Parkway South) of the intersection to facilitate future traffic circulation. The design and construction was completed February 2014.

Signalized Intersection at Rancho Parkway and Sports Park Access Road

The project will provide a signalized intersection on Rancho Parkway at the Sports Park access road to serve the City's Sports Park and adjacent development north of the Park. The project is currently under design and construction is anticipated to be completed in fall 2014.

Saddleback Ranch Road Traffic Enhancements

The project provides for the design and construction of traffic calming improvements such as re-striping, corner bulb-outs, medians, and parkway landscaping. The design phase completion is in 2014, with an anticipated construction phase starting in 2015.
